CHOOSE THE RIGHT MACHINE FOR THE JOB

LIGHTER REMOVAL & TIGHT SPACES

550

Best for residential jobs, apartments, bathrooms, closets, and smaller spaces where maneuverability and transportability are essential. Angle adjustment wheels change the pitch of the blade in seconds for more control. The 550 transports easily with a telescoping handle and light weight frame.

SOFT GOODS REMOVAL

5280 & 6280-COM

The 5280 and 6280-COM are beasts when it comes to soft good removal. The 5280 is self-propelled and offers simple controls and maneuverability, while the 6280-COM offers more power and tooling control, and is designed to fit under racking and in tight spaces. Both of these scrapers have orbital action, allowing your blade to stay in the work.

HARD GOODS REMOVAL

6280-HD & ROGUE

The 6280-HD and Rogue are some of the most innovative walk-behind scrapers on the market. The 6280-HD was designed specifically for hard goods removal, while the Rogue is the only walk-behind scraper on the market with our dual-lift technology, offering more tooling control on the job site. The Rogue can move at speed upwards of 150 ft/min.

WALK-BEHIND COMPARISONS

	550	5280	6280-COM	6280-HD	Rogue
Power Supply	Electric	Electric	Electric	Electric	Electric

Speed	Manual	12-50 ft/min	10-45 ft/min	up to 30 ft/min	3-150 ft/min

How do I decide what walk-behind scraper is right for me?

The scraper that would work best for you depends on the type of flooring you typically take up as well as how often you will be using it. If you are planning on using it infrequently, it may be more cost effective to rent.

If you will be using your machine often, you can make your decision based on if you will be removing hard goods, soft goods, or both (*machines in the hard goods category can tackle both hard and soft goods*):

What are soft and hard goods?

Hard goods include ceramic tile, hard wood flooring, and similar materials. Soft goods include VCT, laminate, and similar materials.

Best for Soft Goods	Best for Hard Goods
